

Horizon® - The only choice for today's CT systems

Satisfy Radiologists

- **Print Versatility-** Horizon's unique ability to print grayscale and color in one imager makes it the only choice for demanding CT applications requiring large format diagnostic film, color for perfusion and 3D rendering, plus low cost grayscale paper for patient and referral copies. Horizon is ideal for printing multi-slice, post-processed images from your workstation.

Lower Total Cost

- **Calculate Savings-** Horizon provides lower hardware, film and service costs than any competing dry imager. Horizon also has the industry's best warranty and first year service is included. Several Horizon models are available to suit your need and budget.

Improve Workflow

- **Speed -** With the fastest time-to-first-print, Horizon prints up to 100 films an hour.
- **Easy To Use Media -** Horizon goes from film to color to grayscale printing with no operator intervention. Horizon's 300 sheet capacity provides extended operation without having to reload.
- **Easy To Site -** Horizon's ultra-compact footprint takes up less than two feet of counter space and weighs less than 70 lbs., allowing it to be placed close to the console.

Horizon[®]

The Only Choice for Today's CT Systems.

Printing 14" x 17" diagnostic film for conventional CT, grayscale paper for referring physicians, and color paper for perfusion/diffusion and 3D images, Horizon supports all of the latest CT applications. Horizon's unmatched versatility allows you to load three types of media at the same time, holds up to 300 sheets of film, and is DICOM and PostScript compatible. Horizon combines multi-media printing capabilities, compact size and speed – all while maintaining a lower total cost of ownership.

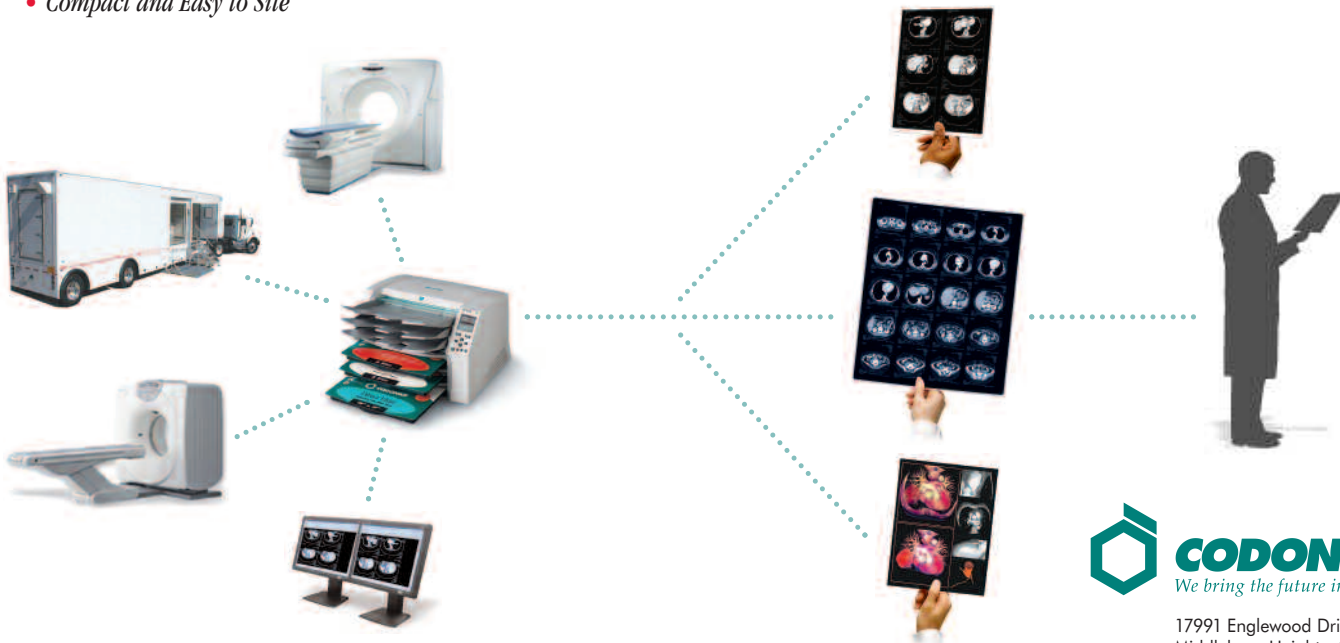

Radiology / Imaging Center

- Direct or Network Connection
- Up to 24 Simultaneous DICOM Connections
- High Throughput
- Compact and Easy to Site
- Engineered for Mobile Applications
- Satisfy Demands from Referring Physicians
- Reduce Costs

Referring Physicians

- Clinical Review
- Patient Consults
- Patient Medical Files
- Surgical Planning
- Patient Marketing
- Perfect for Orthopaedic True-Size Images
