Codonics Integrity Software Updates

Overview

This Technical Brief provides instructions for obtaining and installing software updates for the Codonics Integrity™ Medical Image Importer.

Obtaining the Installer Update File

1. Obtain the Update that you want to install from the Codonics web site or Codonics Technical Service.

2. Copy the Update installer file to a PC's hard drive. The file will be named with the Codonics Part Number, Name and Version.

    Example: 025-078-001.01_lbl_3603_1.0.exe

3. Access the SmartDrive of the Integrity to update by connecting the Integrity's SmartDrive to the PC.

4. If an \updates folder does not exist on the SmartDrive, create one.

5. Transfer the downloaded file to the \updates folder on the SmartDrive.

6. Remove the SmartDrive and re-connect it to Integrity.

Installation Process

1. To assure that Integrity is not processing jobs during the installation, temporarily disconnect Integrity from network connections.

2. Attach a keyboard, mouse and monitor to the system.

3. Minimize the User Interface window by pressing the **Windows**® key and **M** key at the same time.

4. Press the **Windows** key and **E** key at the same time - this will bring up a My Computer window.

5. Browse to the SmartDrive, which is listed in the right pane as a Removable Drive with the name CODONICS. Left-click the SmartDrive and press **Enter**.
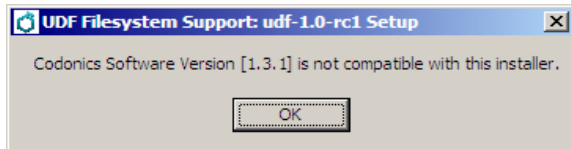

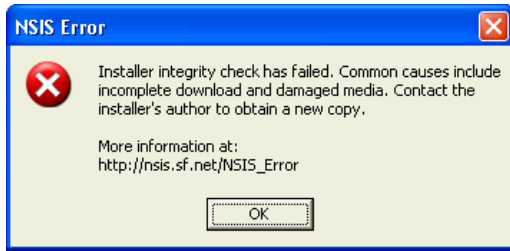

6. Identify the Installer File that was downloaded to the SmartDrive, left-click the Installer File and press **Enter**.

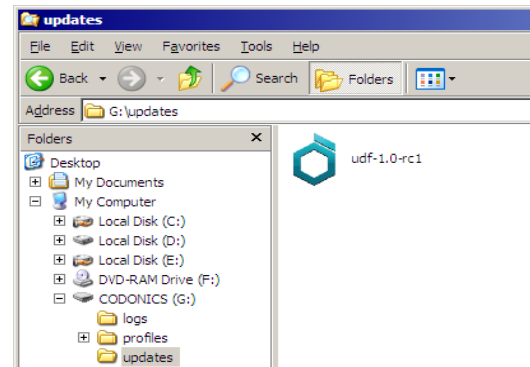

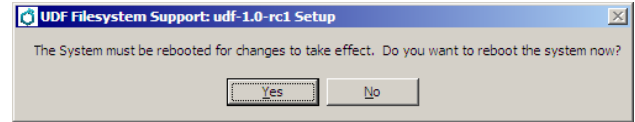

7. You will be asked if you want to continue with the update. If you select **OK**, the Codonics Update Installer will install the necessary files. If it is necessary for the update, the Installer will stop Integrity software.
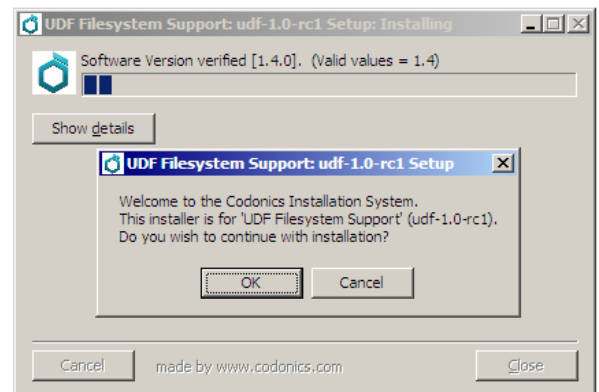

NOTE: If the Installer File was not downloaded correctly, or if this is a system upon which the Update cannot be installed, a dialog box will display an error message. Clicking **OK** on the dialog box will exit the Installer. Examples:

NSIS Error

Installer integrity check has failed. Common causes include incomplete download and damaged media. Contact the installer's author to obtain a new copy.

More information at:
http://nsis.sf.net/NSIS_Error

OK

UDF Filesystem Support: udf-1.0-rc1 Setup

Codonics ProductID [021] is not compatible with this installer.

OK

UDF Filesystem Support: udf-1.0-rc1 Setup

Codonics Software Version [1.3.1] is not compatible with this installer.

OK

8. When the installation completes correctly, a dialog box will appear asking if you want to reboot. If you have multiple updates to install, click **No** and repeat steps 5 through 7 for each update. If this is the only update or you are finished, click **Yes** and the system will reboot.

UDF Filesystem Support: udf-1.0-rc1 Setup

The System must be rebooted for changes to take effect. Do you want to reboot the system now?

Yes   No

9. If necessary, remove keyboard, mouse and/or monitor. Reconnect the network cable.
